May be had of all respectable Ironmongers throughout the kingdom, or wholesale only at MR. JAMES ARTHUR MILES'S Brass Foundry Warehouses, 13, Panoras-lane, Queen-street, Cheapside, London.

PORTLAND CEMENT of superior colour and hydraulic properties.
STAFFORD-SHIRE VITRIFIED BRICKS.
GLAZED PIPES AND FIRE GOODS.
FREEMAN and RICHARDSON, 6, South Wharf, Paddington.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Esq. of the Patentee, — Messrs. ROBINS, ASPDIN, and Co. request reference to No. 298, page 481; and also Nos. 304 and 305, pages 545 and 561 of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, wherein the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in its constituent qualities, harder, and more durable than any other description of Cement; it does not recreate, crystate, or turn green; nor is it affected by any atmospheric influence whatever the climate, resisting alike the action of frost and heat. It is manufactured to set in from five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also at their Depôt, 61, Hanover-street, Liverpool.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost. When used as a stucco it does not vegetate or turn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it carries four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior cementing power, combined with its eminently hydraulic properties, points it out as the fittest material for building sea and riverbank, quay walls, the lining of reservoirs, cisterns, and baths, and for all these purposes where strength and a perfect resistance to water are required.

Manufactory—J. B. WHITE and SONS, Millbank-street, Westminster, and 20, Seel-street, Liverpool.

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and, through long detention at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now in force Cement will be manufactured in London, and thus promises to commence in a fresh and genuine state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for in-door flooring, instead of stone. The peculiar properties of PARIAN Cement allow of its being coloured or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where expedition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

MARTIN'S PATENT
FIRE-PROOF AND ORNAMENTAL CEMENT,
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This invaluable Cement has now been before the public so many years, and obtained so high a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. Messrs. STEVENS and SON, however, feel called upon to observe, that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal use, there will be found a gain of 16½ per cent. in material, full 7 per cent less in price, with an additional saving in labour of 10 per cent., by its allowing about forty minutes for working, being less than one-fourth of the time of other Cements of a quick nature, therefore worked with greater facility, making together the enormous saving of full THIRTY-THREE PER CENT. Its advantages therefore cannot admit of doubt. Specimens, showing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement, in any quantity, obtained of Messrs. STEVENS and SON, at their Plaster and Cement Works, 128, Drury-lane, London.—Manufactory, Derwent Mill, Derby.

N.B. This Cement will receive paint or paper in a few hours after the completion of the work by the plasterers.

JOHNS and Co.'s PATENT PERMANENT STUCCO WASH, CEMENT, and PAINT—The attention of the trade and the public generally is solicited to these very excellent and well-known materials, which, for their beauty, durability, imperviousness, and cheapness are unequalled. THE PERMANENT WASH, as a substitute for common lime-wash or water-colour, in an article which has long been wanting for stucco and brick work; it is of a stone colour, but may be tinted to any other; is perfectly dry in twenty-four hours; will not wash off; is very little dearer than the common washes; and, being a non-absorbent, is admirably adapted for railway stations, union workhouses, asylums, barracks, prisons, &c. One coat is sufficient to cover, with two coats, 8 square yards. THE CEMENT, from the great reduction in price, and its suitableness for internal as well as external surfaces, places it above all other materials of its kind: it has no caustic qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water. The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained, on application to the Sole Agent, PHILIP HARK, at the Warehouse, 33, Bankside, Upper Thames-street. A liberal allowance to wholesale parties.

THE PARIAN CEMENT, for INTERNAL STUCCO, which you supplied at Messrs J. & H. MORLEY'S warehouse and dwelling in Wood-street, Grosham-street, in the City, has been used throughout the premises, in every story; altogether about ten thousand yards superficial, chiefly upon recently-built walls, and a small portion upon timber partitions, and that with the most perfect and satisfactory result. I feel it also necessary to observe, that the plasterers' work was almost incredibly followed up on the next day by the painters, thereby enabling me to have the buildings complete in the shortest possible time, both for business and for the occupation of the establishment. I am, therefore, of opinion that the use of this new material is a most valuable feature in building operations, and fully justifies that which I may direct to be understood, viz., that it was an extraordinary material. I think it right to mention that I am at the present time having a great extent of similar work executed at another range of buildings, where time and the quality of the work are of the utmost importance.

Signed JNO. WALLEN, Architect, London.

To Messrs. Chas. Prentis and Sons, Manufacturers, Stone Rims.

BELL'S PATENT LIQUID CEMENT.—Ready for use on the front of houses, only one-eighth the cost of oil paint; for beauty it is pre-eminent, giving the appearance of fine cut stone. In casks of 1, 2, 5, and 5 cwt., at 8s., 15s., and 30s. the cwt.

PATENT MINERAL PAINT, invaluable for cheapness, beauty, [illegible]

NEW PLASTIC PAINT for DAMP WALLS; an effectual remedy, during or cost. Will dry in a few hours, and may be papered over at once, if desired.—G. BELL and Co., Steam Mills, 5, Wellington-[illegible]
